https://github.com/Gopi821 Hyderabad, Telengana, India

SUMMARY

Aspiring Data Scientist with a strong foundation in data analysis, machine learning, and statistical modeling. Skilled in Python, SQL, data visualization, and predictive analytics, with hands-on experience in building AI-powered applications such as RAG-based chatbots and workflow automation systems. Passionate about solving real-world problems through data-driven insights and innovative AI solutions. Eager to contribute technical expertise, analytical thinking, and continuous learning to impactful projects in data science and AI.

EDUCATION

B.Tech - Civil Engineering

Anurag Engineering College

08/2015 - 07/2019

CGPA

9.15 / 10.0

PROJECTS

AI-Powered Document Question Answering Chatbot (RAG)

01/2026 - 02/2026

AI-Powered Document Question Answering Chatbot (RAG)

- Developed an AI-based document question-answering system that extracts relevant information from uploaded documents using semantic search.
- Implemented Retrieval-Augmented Generation (RAG) using SentenceTransformers to generate embeddings for document text.
- Built REST APIs using FastAPI for document upload, text processing, and query handling.
- Designed an interactive Streamlit web interface for document upload and real-time question answering.
- Integrated ChromaDB vector database for efficient similarity search and retrieval of relevant document chunks.
- Implemented SQLite database to store user queries and maintain chat history.

AI Chat Automation System using n8n and Google Gemini

10/2025 - 11/2025

AI Chat Automation System using n8n and Google Gemini

- Developed an AI-based automation workflow using n8n to manage user messages automatically.
- Integrated Google Gemini API to generate intelligent responses.
- Connected Gmail API to send automated follow-up emails.
- Used memory nodes to store conversation context and improve response quality.
- Automated communication processes using AI-powered workflow automation.

SKILLS

Python	Statistics	Data Analysis
NumPy	Pandas	EDA
Matplotlib	Seaborn	
Machine Learning	NLP	
Deep Learning	Computer Vision	
RAG	Gen-AI	LLMS
MySQL		
SQLite	ChromaDB	

Frame Works and Tools

Jupyter Notebook	VScode
Spyder	PyCharm
Streamlit	
n8n	Antigravity

CERTIFICATIONS

Full Stack Data Science with Gen AI & Agentic AI -Naresh IT

Python 101 for Data Science - IBM Cognitive Class

Deloitte Data Analytics Job Simulation - Forge

Experience in Data Analytics through a job simulation with Deloitte

TRAINING / COURSES

Naresh It Institue, Hyderabad

- Completed 6-month intensive training in Data Science and AI covering Python, Pandas, NumPy, Scikit-learn, DI, SQL, Power BI, Tableau, and OpenCV.
- Built 5+ hands-on projects including computer vision models, deep learning applications, and interactive dashboards for analytics.
- Delivered predictive models achieving up to 95% accuracy
- Designed dashboards that improved reporting efficiency and reduced analysis time significantly.
- Strengthened expertise in machine learning, data visualization, and AI-driven problem solving.
